Visualize the Green Future of Display Technology Today with AOC's 2010 All LED CES Line-up

AOC puts its latest green models on display at Showstoppers CES at The Wynn

Fremont, CA (January 7, 2010) – CES is a major event for technology lovers across the world and so it should come as no surprise that AOC, the world's largest display manufacturer, is putting their latest and "greenest" products out on display. Upcoming models like the M222T Touch Screen AIO PC and the e2237Fw will be on display at the Showstoppers event at The Wynn's Lafitte Ballroom in Las Vegas on January 7th, 2010. We encourage members of the media to drop by the booth and experience the AOC "green difference."

AOC will have several green tech displays available for the media to preview at Showstoppers, including:

- LE24H067-inch flat-panel LED HDTV*
- M222T Touch screen LED PC
- E2237FW LED Monitor - AOC's newest, green signature monitor.

The full line of LED models will be on display at the AOC Media Suite at The Bellagio Hotel, Ballroom 9 from January 7-11th. AOC top-level representatives will be on-hand to answer product questions and discuss what's in store from AOC for the upcoming year.

"We are very excited to take part not only at CES but our first Showstoppers. We've putting our best foot forward and giving the media a preview at some of our most innovative and energy efficient upcoming models," Said Robert Velez, Marketing Director, AOC North America.

This year AOC will focus on models that meet the emerging green standards for the electronics industry. AOC's commitment to green technology has been steadfast, garnering GreenTech approved status for our V22 model, submitting models for EPEAT

certification and ensuring that future models are in line with the industries nascent standards for energy consumption and environmentally friendly packaging.

About AOC

[AOC](#) is a leader of HD display technology for TVs, Monitors, and Multimedia Displays backed by over 60 years of design and manufacturing experience. AOC has earned a reputation for selling user-friendly, technologically advanced displays with every aspect of AOC's business focusing on the development of products that fit seamlessly into consumers' digital lifestyle. AOC continuously meets energy efficiency standards such as the EPA's EPEAT program and has garnered recognitions such as PC Magazine's "GreenTech Approved" designation.

For more information about AOC and its products, please visit www.us.aoc.com or follow us on twitter: www.twitter.com/AOCusa

**Due to limited space only a few of the displays will be available for preview at Showstoppers. To view our complete showcase, please visit us at the Bellagio.*
