DisplayLink Drives AOC 22" USB Powered HD Display – Now Available at Retailers Nationwide

No-Power-Cable Display Elevates Productivity for a World of Multi-Taskers

PALO ALTO, Calif. and FREMONT, Calif. – May 2, 2012 – DisplayLink®, a leading provider of technology for virtual graphics and USB-connected computing, today announced the availability of [AOC](#)®'s new 22-inch High Definition USB Powered Display (model e2251Fwu). This ultra-slim yet affordable LED monitor receives both power and signal solely through USB connection and

offers simple plug-and-play connectivity, making the productivity benefits of dual- and multi-monitor computing available to the masses. The e2251Fwu is equally suitable for business, gaming and entertainment use with its large high definition screen and excellent image quality.

Embedded with DisplayLink's USB 2.0 graphics and connectivity technology for real-time video compression/decompression, AOC's High Definition Powered Display is a mere 10.6 mm thick and is an energy saving "green" monitor running entirely on power delivered via a USB 2.0 cable.

AOC's 22-inch USB Monitor offers impressive image quality with 1920x1080 resolution and 5ms response time. Supported on all leading operating systems, the monitor also comes with a convenient detachable stand that allows it to be used with or without the base like a picture frame.

"It seems that all users—home and business— are now living in a world that demands multi-tasking, and as such, the need for multiple screens has risen exponentially," said John Cummins, VP of sales and marketing for DisplayLink. "AOC's 22-inch High Definition USB Powered Display enables multiple monitors to be added to any desktop/notebook computer platform through the connection of a tidy and simple USB cable at an accessible price point."

Breaking Free from the Shackles of Power and Video Cables Means Less Clutter and Easy Installation

"AOC's High Definition USB Powered Display gives everyone, from road warriors to professionals in home offices and corporate headquarters, the indispensable benefit of being able to clearly see and distribute information across multiple displays," said Robert Velez, AOC Marketing Manager. "Adding the essential second and third USB monitor now means fewer cables, less

clutter and easy installation. Together, AOC and DisplayLink make all of that possible in one sleek package.”

Specifications

- 22-inch full HD monitor
- Ultra-thin at 10.6 millimeters
- Resolution of 1920x1080 (HD)
- 5ms response time
- Plug-and-Play and USB 2.0 bus powered display
- Eco-friendly packaging
- Supported on all leading operating systems including Windows XP / Vista / Windows 7 & Apple MAC OSX Tiger / Leopard and Lion

The new 22-inch monitor extends the range of USB Powered Displays from AOC following the recently announced 16-inch portable LED display, (model e1649Fwu). Also enabled by DisplayLink USB graphics technology, this 16-inch monitor has a built-in Smart Stand that pivots when needed, and offers 1366 x 786 resolution. With PC and MAC compatibility, it is the perfect display for business presentations, photo frame applications and dual monitor setup.
